

MOTORSPORT AUSTRALIA MOTORKHANA TESTS

MEMBER OF

Introduction

This edition of the MOTORSPORT AUSTRALIA MOTORKHANA TESTS Booklet provides diagrams for a number of tests, which may be used at different levels of Motorkhana Events. Organisers of Motorkhana events are encouraged to devise tests of their own for other than National or State Championship events (see Note below).

There are two sections in this booklet. PART A contains tests which must be used for National and State Championship status events and may be used for other events. PART B contains other tests which may be used in non- championship events.

Each Part is indexed separately. Test names are listed alphabetically in each index. For convenience, test with similar flag layouts have been grouped together wherever possible. Drawings of all tests have been revised and updated, and the images will also be available in electronic form to assist organisers with test layout sheets. Download from motorsport.org.au

The tests presented in this booklet are each designed to suit a variety of ground sizes and surface conditions, therefore, a test which may work well in one location may not necessarily do so elsewhere. Some pre-planning may be required by event organisers to find the most suitable test choice to use from the tests listed.

NOTE

For championship status events, only tests from PART A of this booklet may be used. For non-championship events, tests may be chosen from either PART A or PART B of this booklet, or organisers may devise tests of their own.

Where it is intended to only use tests taken from this booklet, it is sufficient to indicate in the Supplementary Regulations that the event will be conducted under the National Motorkhana Code and that tests will be chosen from the Motorsport Australia Motorkhana Tests Booklet.

When event organisers create their own test/s for a non-championship event, then a sketch of the proposed test/s showing all dimensions etc., should be lodged with the Event Organising Permit Application Form to Motorsport Australia.
