

OFF ROAD

STANDING REGULATIONS

| Modified Article | Date of Application | Date of Publication |
|------------------|---------------------|---------------------|
| | | |

1. DESCRIPTION

- (a) Off Road events are timed events, but not speed events, conducted primarily on sand and/or defined tracks in desert or bush areas. Because the nature of off road events emphasises negotiation of difficult terrain, including contrived and natural obstacles and difficulties, the emphasis is on vehicle and driver ability rather than on outright vehicle speed.
- (b) Off Road events are conducted under the International Sporting Code of the FIA, the National Competition Rules of Motorsport Australia, these Standing Regulations and such Supplementary Regulations as may be issued by, or in conjunction with, the organisers of specific events.
- (c) The organisers may issue Further Regulations and/or instructions to Competitors and/or to drivers. Provided that they are issued in accordance with the NCR, such regulations shall have the same effect as these regulations.

2. DEFINITIONS

The following terms apply to these regulations:

- (a) **Short Course Event:** An off road event conducted on a circuit not exceeding 15km in length.
- (b) **Long Course Event:** An off road event, normally of not less than 100km in total distance, conducted on a course which is more than 15km in length.
- (c) **Time:** The actual time taken by each competing vehicle to complete the course.
- (d) **Score:** The time taken to complete the course, to which any penalties incurred have been added.
- (e) **Results:** The ranking of scores provided by the timekeeper to the Clerk of the Course and verified by him before publication.
- (f) **Section:** Events may be divided into sections. A section may, but will not necessarily, consist of one or more laps or passes of the course. A section will be started by the order of the starter, and will end on the display of the finishing flag to the relevant Competitor.
- (g) **Short-Cut:** Shortening, or otherwise failing to follow, the course in such a way as to gain an advantage.
- (h) **False Start/Jumping the Start:** A false start occurs when an automobile under starter's orders is outside its prescribed position or is moving when the starting signal is given. Automobiles will be deemed to be under starters orders 10 seconds prior to the start signal.

3. COMPETITORS

3.1 COMPETITOR LICENCES

- (a) For competition licence requirements, refer to "General Regulations of Motorsport Australia" in the Motorsport Australia Manual.
- (b) Where the driver of an automobile is less than 18 years old and does not hold a current civil driver's licence, they must be accompanied at all times while competing by a crew member, in the vehicle, who either holds a current civil driver's licence or is not less than 18 years old.
- (c) The minimum age for participation in off road events is:
 - (i) below State Championship except where this contravenes State legislation:

| | |
|------------------|----|
| Driver | 14 |
| Co-driver | 14 |
| Navigator | 12 |

- (ii) State Championship and higher except where this contravenes State legislation:

| | |
|------------------|----|
| Driver | 16 |
| Co-driver | 16 |
| Navigator | 14 |

- (iii) International events: At the discretion of Motorsport Australia.

3.2 CREWS:

- (a) In short course events crews may consist of either one or two persons, as specified in supplementary regulations.
- (b) In a long course Off Road event, the crews of each vehicle shall consist of two persons except where class regulations permit an automobile to be fitted with only one seat, in which case the crew shall consist of only one person.
- (c) Not more than two members of the crew shall occupy any competing car at any time.
- (d) Crew members will be designated as:
- (i) Driver: may drive and/or navigate.
 - (ii) Co-driver: may drive and/or navigate but is likely to be navigator at the start of the event.
 - (iii) Navigator: may only navigate.

3.3 ELIGIBILITY

- (a) Club events may be contested only by members of the organising club.
- (b) Multi-club events may be contested by members of the organising club or of one of the invited clubs specified in the event supplementary regulations.
- (c) State and national championship events may be contested by any Motorsport Australia National Off Road Licence holder complying with the provisions of article 3.1.

3.4 NEW DRIVERS

Drivers participating in one of their first two off road events, and/or in their first event of State level or above, shall have displayed on the rear of the car a "P" plate as described in Schedule K (refer "General Requirements for Cars and Drivers" in the Motorsport Australia Manual).

3.5 ATTIRE

- (a) During all competitions, crew members are required to wear:
- (i) helmets complying with a standard listed in Schedule D (refer "General Requirements for Cars and Drivers")
 - (ii) apparel complying with the provisions of Schedule D.
- (b) In vehicles not fitted with full windscreens, crew members must also wear goggles or visors complying with the provisions of Schedule D.

3.6 ENTRIES

Supplementary Regulations must stipulate the maximum number of entries which will be accepted for the event.

3.7 SELECTION

Supplementary Regulations are to specify the means of selection of entries should the event be over-subscribed. Australian Off Road Championship Events must give priority to Registered Australian Off Road Championship competitors first then all other entries in order of receipt of payment.

4. VEHICLES

4.1 ELIGIBILITY

All vehicles used in off road competition must comply with the provisions of "Off Road" in the Motorsport Australia Manual.

4.2 VEHICLE CLASSES

- (a) Vehicles will be classified as follows:

| | |
|--|--|
| Pro Buggy | Buggies with engines not exceeding 6000cc for petrol engines or 7200cc for diesel engines |
| Prolite Buggy | Buggies with engines up to 3500cc, naturally aspirated |
| Sportslite | Buggy or Extreme 2WD petrol engines, with engine capacity for naturally aspirated engines to a maximum of 2500cc or four (4) cylinder forced induction engines to a maximum capacity (swept volume) of 1600c |
| Super 1650 Buggy | Buggies with engines not exceeding 1650cc |
| Sportsman Buggy | Buggies with engines not exceeding 1330cc |
| Performance 2WD | Modified 2WD with engines not exceeding 6000cc for petrol engines or 7200cc for diesel engines |
| Extreme 2WD | Highly-modified 2WD with engines not exceeding 6000cc for petrol engines or 7200cc for diesel engines |
| Production 4WD | Production 4WD with engines not exceeding 6000cc for petrol engines or 7200cc for diesel engines |
| Extreme 4WD | Highly-modified 4WD with engines not exceeding 6000cc for petrol engines or 7200cc for diesel engines |
| <u>Subclass</u> Extreme 4WD Buggy | 4WD Buggies with engines not exceeding 6000cc for petrol engines or 7200cc for diesel engines NOTE: refer to 4.2(c) below for eligibility conditions |
| SXS <u>Pro Turbo</u> | Off Road recreational vehicles (e.g., Polaris, Can-Am) with a supercharged/turbocharged engine capacity not exceeding 2050cc |
| SXS Sport | Off Road recreational vehicles (e.g., Polaris, Can-Am) with a naturally aspirated engine of a capacity not exceeding 1200cc |
| Extreme Lite Buggy | Extreme Lite Buggy is a small single seat off road buggy intended for use in short course off road competition. Refer to Off Road Extreme Lite Buggies on the Motorsport Australia website for further regulations. |
| Off Road Kart | Off Road Kart is a small off road vehicle intended for use in short course off road competition. Refer to Off Road Kart Standing Regulations on the Motorsport Australia website for further regulations. |
| Classic Off Road | Classic Off Road showcases pre-1996 off road vehicles. Refer to Off Road Classic Standing Regulations on the Motorsport Australia website for further regulations. |

NOTE: The list of allocated class off road numbers can be found in the Off Road General Requirements - 30(h).

NOTE: Refer to Specific Requirements for Off Road Vehicles on the Motorsport Australia website to view the class regulations.

NOTE: For rotary engine and supercharged/turbocharged multiplication factors refer to Classification of Automobiles in the Motorsport Australia Manual. For diesel engine multiplication factors refer to Off Road General Requirements Article 28.

- (b) Separate competitions may be authorised by the Australian Off Road Commission for Trophy Karts complying with regulations published by Motorsport Australia.

Performance 2WD, Extreme 2WD, Production 4WD and Extreme 4WD may be further sub-divided on the basis of technical specification at the discretion of the event organisers. Details of such subdivisions are to be included in event supplementary regulations or series regulations.

- (c) Extreme 4WD Buggy will only be eligible for competition at State event level and below and at the discretion event organisers.

4.3 GENERAL REQUIREMENTS

All vehicles shall comply with the General Requirements for Off Road vehicles, the Specific Requirements for the relevant class (refer "Off Road" in the Motorsport Australia Manual), the provisions of Schedules A and B as appropriate (refer "General Requirements for Cars and Drivers"), and the Supplementary Regulations for the event.

4.4 LOG BOOKS

- (a) Each competing vehicle must be the subject of a current Motorsport Australia log book, which must be presented at scrutineering for each event (see Schedule L, Article 1 – refer "General Requirements for Cars and Drivers").
- (b) At events, log books are to be held by the Chief Scrutineer until the completion of competition for that vehicle.

4.5 NOISE

Cars may be required to be subjected to a noise emission test prior to starting in any event or at any time during the competition. The maximum noise emission permitted from any vehicle is 95dB(A). Testing shall be conducted in accordance with the requirements detailed in Appendix A.

4.6 REFUELLING:

The following regulations apply to any operation that involves refuelling and/or the removal/ opening of a fuel filler cap:

- (a) Refuelling may be undertaken only at points nominated by the organisers and specified in the Supplementary Regulations.
- (b) The fuel filler cap/s of the vehicle, and the caps/covers/plugs of all refuelling containers must remain securely in place until after all occupants have vacated the vehicle and disconnected themselves from it, and the engine has been switched off. It is not permitted either to switch on the engine, or for any person to enter the vehicle, until after the filler cap has been replaced on the vehicle, and the refuelling containers have been either re-closed or removed from the vicinity of the vehicle. An additional crew member must stand by the crew refuelling with a minimum 0.9kg fire extinguisher at the ready.
- (c) All persons involved in refuelling operations, or within two metres of refuelling or venting points whilst the vehicle is being refuelled, are to be attired in at least shoes and socks, and non-flammable clothing from wrist to neck to ankle.
- (d) The Organiser is to establish a designated "refuelling area", specifically set aside for the purpose of refuelling during competition. It is strongly recommended that each Competitor utilises some form of earth spike to reduce the possibility of static build up while refuelling. Except as otherwise specifically provided in regulations applicable to the event, refuelling outside of these areas is prohibited.
- (e) If a vehicle runs out of fuel on the course the Clerk of the Course, or their nominated deputy, may give written permission for that vehicle to be refuelled on the course, provided always that safety is not compromised in any way.

4.7 OUTSIDE SERVICING

- (a) Servicing of a competing vehicle during an event other than in the designated pits is prohibited. This prohibition shall not apply where such servicing;
 - (i) is carried out only by a Crew member of a vehicle which started in the competition (that section), whether it be the vehicle in question or another competing vehicle;
 - (ii) uses no parts or equipment other than those which have been carried from the pits, after the start of the event, in a vehicle which started the event (in either the vehicle in question or another competing vehicle), or which have been carried from the pits by a Crew member of the vehicle in question, on foot, without any assistance outside the pit/paddock area;
 - (iii) uses any article or material which might normally be found in the region, e.g. water, fencing wire, string and the like, (other than as provided for above this does not apply to automotive components or tools); and/or
 - (iv) is rendered by an official recovery crew, with that Crew's agreement, and which takes the form of:
 - (A) towing to the next accessible passage control, or the next recovery point,
 - (B) provision of tools, but NOT parts, and/or
 - (C) provision of water.

- (b) The Clerk of the Course, or their nominated deputy, may provide written permission for pit crews to provide assistance at a passage control or recovery point, or for Crews to be carried from the course to the pits and back again; this permission being valid for one instance only.

4.8 TRIENNIEL VEHICLE INSPECTION

Each vehicle must undergo an inspection every three years where compliance with safety regulations and the vehicle structure shall be examined. The inspection must be overseen by a scrutineer with a minimum of a Silver Scrutineer licence utilising the Motorsport Australia Off Road Triennial Vehicle Inspection Form. When the Triennial Inspection is satisfactorily completed, an entry to that effect shall be made in the Vehicle Log Book by the Scrutineer undertaking the inspection.

4.9 NAVIGATION

The use of radio communication for navigation is prohibited during competition.

4.10 RADIOS

Each automobile competing in a long course off road event (and recommended for all others) is required to carry an operational UHF radio, either hard wired or portable, of at least five watt power output. If the radio is equipped with 'VOX' this must be disabled. Any transmissions between Competitors and their crews must be on a channel other than those advised by the organisers for car to car, recovery crew or otherwise designated for use by the organisers. Any car to car communication is to be limited to occasions where cars are seeking to pass the car in front.

4.11 MOTORSPORT AUSTRALIA LOGO

In all competitions of State Championship and above, the Motorsport Australia logo shall be placed on the vehicle. The stickers shall be placed between the main roll bar hoop and the front suspension on the side of the coachwork of the vehicle, free from visual obstruction and as high as possible.

5. BEFORE THE EVENT OFF ROAD

5.1 PRACTICE

- (a) Practice is not permitted for long course events.
- (b) In the case of short course events, Supplementary Regulations shall state what practice if any is to be provided.

5.2 SCRUTINEERING

- (a) Each competing vehicle must undergo a detailed examination for safety before taking any part in the competition, including any practice or prologue, and no vehicle may compete without the approval of the Chief Scrutineer.
- (b) Any car involved in an accident may be the subject of re-examination by the Chief Scrutineer or their delegate before being permitted to take further part in the competition.

5.3 BRIEFING

A meeting called by the organisers for each Crew and, where required, for officials to give general information relating to the Event. It is required that organisers provide a mandatory crew briefing prior to the start of a competition. Responsibility falls on the Event Organisers to ensure full attendance at the Briefing.

5.4 RECONNAISSANCE

- (a) For long course events, organisers are to provide the opportunity for reconnaissance of the course by Competitors.
- (b) This reconnaissance, the time for which will be specified in supplementary or further regulations may, unless otherwise stipulated, be undertaken in any vehicle available to the Competitor, but the number of passengers in each vehicle is limited to the number of seats equipped with seat belts.
- (c) Only the Driver and Co Driver/Navigator named on the entry form for the event may participate in Reconnaissance.

6. THE COURSE

6.1 SURFACE:

- (a) The surface and terrain of the course should be varied.
- (b) The course should be clearly defined and arranged in a way that minimises the likelihood of competing vehicles straying therefrom unintentionally, or of a collision between competing vehicles travelling on other parts of the course.

- (c) Shortcutting and deviation from the course, which includes driving on the course against the direction of travel, are strictly prohibited.

6.2 APPROVAL

- (a) Prior to any event taking place, the course is subject to approval once a permit application is received by a Motorsport Australia Permit Officer. The Motorsport Australia Permit Officer may at their sole discretion decide whether or not to enforce an inspection prior to the event and may require a plan of the course to be submitted with the application for permit. This plan must include the paddock/pit area layout.
- (a) No Off Road course shall contain any straight section of track of more than two kilometres in length without an obstacle or deviation, either natural or contrived that requires a significant reduction in speed to negotiate.

6.3 ROAD CLOSURES

- (a) It is mandatory for competitive sections that all roads/tracks used for competition are positively closed to all except off road traffic. Any vehicular access to the route via formed roads must be closed off by a locked gate or equivalent, or be supervised by the presence of road closure officials. Whether manned or not by an official there remains the requirement for a physical indication that the road is closed, which may be in the form of barrier mesh, an official's car or some other clear indication that the road should not be used.
- (b) All roads intersecting within the course which, if taken may result in competing automobiles mistakenly driving in the opposite direction to competition traffic, or coming into contact with officials or members of the public must have some form of physical barrier across them, in addition to barrier mesh or bunting and at least one 'no road sign' as outlined in Article 7.2(v).
- (c) All officials stationed at road closures must be briefed on the procedures for road closures, and of their importance. They must also have identification so that they are easily recognisable by persons not involved in the event.

7. COURSE MARKING

7.1 MARKING

- (a) The course is to be clearly marked, and examples of all signs used for course marking must be prominently displayed at the start.
- (b) Unseen or blind hazards such as ditches, stumps, drop-offs, gates, gate posts or fences on or near the course are to be identified to Competitors in advance by means of appropriate markers or hazard signs, not less than 100m from the hazard, placed on both sides of the course. The absence of any such sign shall not be grounds for protest.

7.2 COURSE MARKERS:

- (a) Marking signs must be as follows:
 - (i) **Direction arrows:** indicate the direction of the competition course. All direction arrows must be red on a white Direction Arrows background. The arrow is to be at least 300mm long, and 150mm wide across the head, on a mounting board at least 450 x 225mm.

- (ii) **"Danger" signs:** indicate a hazard likely to require significantly more than usual care to traverse safely. They are to take the form of a vivid red square, one on each side of the course, placed at the hazard.

- (iii) **“Pre-danger” signs:** indicate a “Danger” sign ahead. “Pre-danger” signs take the form of a red dot, at least 150mm diameter, on a white square background. They are to be positioned one on each side of the course, so that they provide adequate warning for vehicles travelling at competition speeds to slow sufficiently and traverse the hazard safely.

- (iv) **“Caution” Sign:** to indicate hazards which warrant additional care in traversing, but which are not sufficiently severe to warrant the use of “Danger” signs. They are to take the form of a red triangle, with 300mm sides, on a white background. They are to be placed at the hazard in question, one on each side of the course.

- (v) **“No Road” sign:** to indicate a road/track/etc. which is not part of the competition course. They take the form of a black “X” on an orange background and are to be placed along the relevant side so they can be seen as early as possible by Competitors on the course.

- (vi) **Braking Markers:** optional, to be placed at the end of a straight to indicate the approach of a corner or other obstacle which may require braking to negotiate. 100, 200 and 300 metre markers will be placed at the appropriate intervals preceding the obstacle. Signs shall be black on white, with the number to be at least 300mm long, and 150mm high, on a mounting board at least 450 x 225mm.

- (b) Except for direction arrows and braking markers, all signs are to be mounted on boards at least 450 mm square.
- (c) Where necessary in order to provide adequate contrast with the surrounding terrain (e.g., a white border around the “No Road” sign, when against a red dirt background), event organisers may apply to AORCom for permission to modify any of the above colours.
- (d) Notwithstanding the use of such signs, Competitors should not place total reliance on them, but continue to exercise due care at all times.

7.3 POSITIONING OF MARKERS

Within the constraints of Article 7.2, all markers should be placed as set out in the table below;

| | |
|----------------------------------|---|
| Arrows | Indicates direction of travel. |
| | To be placed on the <u>left-hand side</u> of the course, clearly visible 40-50 metres before the corner. |
| | Use two arrows, one on each side of track to have cars go between. |
| Large Arrows (e.g. Pines) | To be placed head-on at the corner – must be preceded by the regular directional arrow 50 metres before. |
| Caution | To be placed on the caution, both sides of the track. |
| Pre-Danger | To be placed approximately 100 metres before danger, both sides of track. |
| Danger | To be placed on the ‘danger’, both sides of the track. |
| No Road | To be placed on the ‘no road’, clearly visible. |
| | Where the possibility exists of intersecting with another road where competition is occurring or with members of the public, another form of immovable delineation should be placed on or over the road to ensure a collision does not occur. |

8. START

8.1 NUMBER OF STARTERS

The number of starters shall not exceed four per kilometre of lap distance, unless Motorsport Australia approves otherwise.

8.2 START ORDER

- (a) All cars must start in the order prescribed by the organisers. In long course events, this is normally based on the result of a prologue.
- (b) Should any Competitor not attempt or complete the prologue due to accident or mechanical malfunction, the organisers may at their discretion allocate a starting position based on information before them relating to the usual performance of the driver/s in question. Otherwise such drivers/crew will be allocated starting places behind those who did complete the prologue. For rounds of the AORC no Competitor who has applied to be seeded may be seeded within the top 10% of cars starting the event, if fewer than 100; and not within the top 10 cars if more than 100.
- (c) A driver/crew may make only one unimpeded attempt at the prologue. Where a crew has been stopped or delayed by an official, to render assistance where bodily harm might be expected to have occurred or by the course becoming impassable, the Stewards may at their absolute discretion approve another attempt. Any request for another attempt must be made through the Clerk of the Course.

- (d) Notwithstanding the provisions of Article 8.2(a) above, event organisers may conduct "Top 10 Shootout"-type activities. Such activities may require a specified number of the fastest vehicles in the event prologue to compulsorily compete on a one-at-a-time basis over a designated course, with the results of that activity re-determining the starting order amongst those participants. In such cases normal seeding for the event would take place after the shootout. Where such an activity is conducted, relevant details are to be included in the event Supplementary Regulations.
- (e) Where a driver/crew is deemed by the Stewards to have infringed the regulations during prologue, that driver/crew will be deemed not to have finished prologue and shall be seeded as such. The penalty for an infringement during prologue shall be a time penalty of five minutes to be added to their Section 1 time at the end of the event. Should the circumstances warrant, the Stewards may apply additional penalty. The penalty shall be recorded, irrespective of whether the driver/crew finishes.

8.3 INTERVALS

- (a) Cars should be started singly and at intervals of not less than 15 seconds. Having regard for the nature and length of the course, Motorsport Australia may authorise a greater number of cars to start simultaneously subject to its specific approval.
- (b) The starting intervals may be made greater, having due regard for prevailing conditions of topography and visibility.

8.4 STARTER'S ORDERS

- (a) Drivers shall be under starter's orders 10 seconds prior to the start signal.
- (b) Any driver who fails to proceed to the start at the direction of an official may forfeit their run or, alternatively, may be deemed by the organisers to have started at their designated start time.
- (c) In short course off road events where a marshalling area is being used, a Competitor who arrives at the start late may, at the discretion of the event Clerk of the Course, be held in the marshalling area until after the entire field for that group has started. They may then be released from the marshalling area to the start line, where they will be started by the starter. In such circumstances their recorded start time will be the start time they would have had had they started from the grid at their correct time.

8.5 PERMISSION TO START

- (a) No event, or prologue, may be commenced without the Chief Steward's permission.
- (b) Before starting the event, or prologue, the Clerk of the Course is to provide to the Chief Steward a completed Form 5-3-5 (Venue and Personnel Report) certifying that the course is fully manned and ready for competition. Once they are satisfied that all is in order, the Chief Steward will give their permission for the event, or prologue, to commence.

9. DRIVING CONDUCT

- (a) During the event, a vehicle alone on the course may use the full width of the course.
- (b) As soon as it has been caught by a vehicle which is either temporarily or consistently faster, the driver of the slower vehicle is to give the other vehicle right of way as soon as possible, pulling to the side and stopping if necessary.
- (c) The desire to overtake shall be signalled by the sounding of the horn and/or the flashing of headlamps. Running into the vehicle ahead is not an acceptable method of signalling this desire.

10. FINISH OFF ROAD

10.1 SHORT COURSE

To be classified as a finisher in short course events, a crew must complete all laps of the course unless specified otherwise in Supplementary Regulations.

10.2 LONG COURSE

In long course events, to be classified as a finisher a crew must complete the entire course; i.e., must start and finish all laps and must pass through all passage controls in the correct direction, unless the Supplementary Regulations provide otherwise.

10.3 GENERAL

- (a) Organisers must exercise care to ensure that adequate time exists for each of the entered crew to complete the event assuming a trouble-free run.
- (b) To be classified as finishers, vehicles must reach the finishing line at the end of each lap under their own power, with the crew seated in their correct positions in the vehicle, and within the time allowed as stipulated in the event regulations.

- (c) Each crew's times will be credited only when all wheels of the car are within the course as it crosses the finish line.
- (d) Any vehicle which is towed or pushed by any other vehicle (other than an official vehicle provided by the organisers) for more than 400m on any lap shall be disqualified from results.

11. PERFORMANCE

11.1 SHORT COURSE

- (a) The criteria of performance in short course events shall be the total elapsed time, including penalties if any, or as otherwise specified in event regulations.
- (b) Whether the cars are started consecutively or simultaneously, their relative positions at the conclusion of the specified number of laps shall in itself have no effect upon the results.

11.2 SHORT COURSE EVENT PENALTIES

- (a) Penalties may include the following:
 - (i) jumping the start/false start: one minute;
 - (ii) striking a course marker: 30 seconds per marker;
 - (iii) not following the prescribed course, or displacing any course marker: one minute, but up to 15 minutes if so provided in Supplementary Regulations;
 - (iv) dangerous driving: disqualification, and
 - (v) deliberate interference with or impeding other Competitors: one minute each occurrence.
- (b) The last two penalties may be imposed without prejudice to such additional penalty as may be deemed appropriate by the Stewards.)

11.3 LONG COURSE:

In long course events, results may be determined by elapsed time, by the use of timing increments, usually of one second.

12. RESULTS

- (a) In long course event's organisers should provide progressive results after each lap.
- (b) The Secretary is to forward results to Motorsport Australia and to each Competitor in accordance with the NCR.
- (c) Where an event is stopped prior to the scheduled finish for reasons of force majeure, results are to be determined on the basis of the order in which those Competitors who have not retired or been disqualified last passed through the finish control, together with the number of laps they had completed as they passed through that control.

13. SAFETY

13.1 MEDICAL SERVICES

As specified in the General Regulations of Motorsport Australia – Medical Services/Requirements (refer "General Regulations of Motorsport Australia" in the Motorsport Australia Manual).

13.2 FIRE EQUIPMENT

- (a) Suitable firefighting equipment must be provided at the start, in the paddock, in the refuelling area and at the finish line.
- (b) Whilst any vehicle is being refuelled, its engine must be turned off and no crew member may occupy the car (refer article 4.6).
- (c) When refuelling is undertaken other than in a designated refuelling area, at least one person must hold a fire extinguisher ready for use.

13.3 SPECTATORS

- (a) When spectator attendance can be expected it is the organisers' responsibility to provide safe viewing facilities. All events must comply with the Motorsport Australia Off Road Spectator Safety Procedures.
- (b) For certain events, Motorsport Australia may require the appointment to the organising committee of a person with responsibility for spectator control.

- (c) Every spectator point must be manned by clearly identified spectator marshals who must work under the direction of a senior marshal. Areas in which spectators are prohibited must be clearly identified.

13.4 PADDOCK ENCLOSURES

The paddock enclosure must be not less than 45m from the course unless there is a suitable protective or natural barrier.

13.5 FLAG SIGNALS

- (a) Flag signals may be used to warn competing crews of danger, or of other situations requiring caution.
- (b) When used, flag signals will have the same meanings as those specified in Appendix H to the NCR (refer "General Requirements for Cars and Drivers" in the Motorsport Australia Manual), and this use is to be indicated where applicable both in event regulations and at drivers' briefings. The signals are also to be given as specified in Appendix H to the NCR.

13.6 HOT WORK AREAS

At all events the organisers are to establish a designated "Hot Work Area", specifically set aside exclusively for welding, grinding and other similar hazardous activities. Such activities are prohibited outside these designated areas.

14. OFF ROAD LONG COURSE EMERGENCY PROCEDURE

14.1 SIGNS

- (a) All vehicles shall carry at least one "OK/SOS" sign and warning triangle. This will have the green "OK" symbol on one side and the red "SOS" on the other side (the latter in "landscape" view), and be printed on a white card (minimum 130gsm) or plastic board. This card must be at least A4 size (297mm x 210mm).
- (b) As an alternative, organisers or crews may supply their own rigid signs providing that the area of the mounting sheet is at least 620cm² and the letters and symbols are clearly discernible and fit for purpose. Such signs may be mounted on to rectangular or triangular self-supporting brackets.
- (c) Organisers are required to provide the "OK"/"SOS" signs and these signs will be incorporated into a Booklet (preferably weatherproof), which will also include the Long Course Emergency Procedures, Incident Reports and other appropriate information deemed necessary by the organiser.
- (d) Warning triangle: In the event of a car stopping on the course a warning triangle must be displayed in a conspicuous position approximately 50 metres behind the car except where the car does not present a hazard to any following cars and crew or the crew of the stopped car. Following crews sighting the warning triangle must drive with caution and reduce speed until the stopped car has been passed.

14.2 PROCEDURE IN CASE OF INJURY

- (a) In the event of an accident where injuries are sustained that require immediate medical attention, the "SOS" sign must be clearly displayed to following vehicles.
- (b) If the "SOS" sign is displayed, or if a vehicle is stopped and no sign is displayed, then the next two crews must stop and render assistance.
- (c) Unless signalled to render further assistance by the two crews on the scene, or the competition has been neutralised by the Clerk of the Course, other crews shall pass the scene safely at reduced speed as though under yellow flag conditions, and then recommence competition once clear.
- (d) If medical attention is required, event command shall be informed by way of on-board radio or mobile telephone. If neither is available or operable, having noted the position of the stopped vehicle and the general nature of the injury, one of the stopped crews is to depart for the next recovery/radio point, travelling in the direction of the competition route. The recovery crew shall then inform event command of the incident.
- (e) The Clerk of the Course may allow time lost by the crews next on the scene after an accident, provided that accident is such that bodily harm might reasonably be expected to have occurred or to be imminent.
- (f) An incident report must be lodged (which should include details of any witnesses) as soon as practicable with the Clerk of the Course.

14.3 PROCEDURE WHERE NO INJURY OCCURS

If a car is stopped on course for any reason (e.g., mechanical problem, crash) and no injuries are sustained that require medical attention, the "OK" sign must be clearly displayed by the crew involved to following vehicles.

14.4 GENERAL

- (a) Both the warning triangle and the “OK” sign must be left on display for the entire length of the time that the car is stopped on the course, regardless of whether or not the crew remain with the car. Failure to display either or both these signs as appropriate may result in disciplinary action being taken. Crews are required to remove the warning triangle once the stopped car has been moved to a safe position and no longer presents a hazard, or they recommence the competition.
- (b) In displaying the applicable signs, crews must consider their own safety and stay a safe distance from the competition course. It is recommended that the appropriate sign be securely attached to the vehicle itself in a location that will be obvious to passing cars. Race tape or cable ties are possible methods of attachment.
- (c) If it is possible to do so without endangering the crew or officials, the car should be moved a safe distance from the competition course.

14.5 ASSISTANCE FROM AIRCRAFT

Assistance for competing crew from persons in helicopters or other aircraft is permitted only for the purpose of assisting in an emergency situation.

14.6 OFFICIALS

- (a) Organisers must make appropriate personal protective equipment, including hearing and eye protection, available to all officials.
- (b) Officials and official vehicles must have correct and adequate identification. This identification should always be worn by personnel and attached to vehicles so that officials can be recognised immediately.

15. VENUE

The following areas should be clearly delineated at the venue:

(a) CAMPING GROUND – COMPETITORS

The camping ground should be separate from any public camping ground and provide for Competitors and their families.

(b) PADDOCK AREA

- (i) The paddock is the area where the competing cars and support services are located during the event. It should be separate from the camping area and from the spectator area.
- (ii) The paddock may be designated as “pits” for various times throughout events.
- (iii) Refuelling in a paddock situation may only be carried out during non-competition time

(c) PITS

- (i) The pits are for use by competing cars only, and only for the purpose of refuelling and running repairs during the event.
- (ii) Only crew members, pit crew members and officials may be admitted to the pits. As it is part of the track, members of the public, and particularly children, must be kept out of this area.
- (iii) During competition, any vehicle which leaves the pits, other than to re-join the event or to go to a designated refuelling area, will be deemed to have withdrawn from the event.

16. CANCELLATION, ABANDONMENT AND ALTERATION

The promoters may reserve the right to abandon an event if in their opinion the number of entries is insufficient, or with the permission of the Stewards, if conditions constitute force majeure as outlined in the NCR. In the case of an Event being cancelled due to Force Majeure the Organiser may retain up to 25 per cent of the Entry Fee.

17. AUSTRALIAN OFF ROAD CHAMPIONSHIP

See Australian Off Road Championship Sporting Regulations and “General Regulations of Motorsport Australia” in the Motorsport Australia Manual. In the event of any conflict between AORC Sporting Regulations and the Off Road Standing Regulations, AORC Sporting Regulations are to take precedence.

18. COMPASSIONATE TIME ALLOWANCE

Event Clerks of the Course may, at their absolute discretion, award compassionate time to any Competitor

who stops during an event to render assistance where bodily harm might reasonably be expected to have occurred, or to be imminent.

19. DUAL-STATUS EVENTS

- (a) For dual-status off road events, the per capita permit fee applicable to the lower status component of the event will be payable by event organisers in respect of those Competitors competing only at the lower level, provided that these Competitors may only complete a maximum of 75% of the total distance of the higher status component, and do not appear in the results of the higher status component.
- (b) For all other Competitors the fee applicable to be higher status component will be payable.

20. PENALTIES

The following are offences against these Standing Regulations, and are to result in the imposition of the following penalties:

- (a) Unauthorised towing for more than 400 metres on any one lap: Disqualification.
- (b) Failure to report at a main (time) control: Disqualification.
- (c) Other breaches, as prescribed in event regulations: Up to 100 minutes.

Appendix A – Off Road Noise Testing Procedure

1.1 GENERAL

- (a) Each Off Road automobile may be subject to a noise emission test prior to starting any event or at any time during an event. The maximum noise emission from any automobile is 95dB(A).
- (b) The testing official shall be deemed a Judge of Fact for the purpose of and in respect of any measurements taken.
- (c) Testing results shall be confidential and only be shared with the affected competitor and/or the event Stewards (for judicial purposes) and/or Motorsport Australia.

1.2 OFF ROAD

- (a) Testing is to be carried out with a noise meter which is calibrated to the appropriate Australian Standard.
- (b) Testing shall be by the “drive-by” method.
- (c) The noise meter test position must not be less than 30 metres from the edge of the defined track when measured at an angle of 90° to the line of the track.
- (d) The noise meter shall be positioned on a sturdy base (e.g. tripod) and be isolated as far as is practicable from vibrations. The body of the person/s undertaking the test shall be located at an arm’s length or greater from the meter.
- (e) Each meter shall be calibrated with a portable calibration tester immediately before and after each testing session.
- (f) The background noise level shall be checked and shall be a difference of 10 dB(A) or greater than of the noise source (i.e. automobile tested), otherwise an adjustment in accordance with the following shall be applied:
 - (i) Up to 5dB difference: apply a subtraction of 2dB from the level measured from the source;
 - (ii) 6 to 9dB difference: apply a subtraction of 1dB from the level measured from the source;
 - (iii) 10dB or greater: not adjustment applied.
- (g) Wind speed must be measured and if the wind speed is greater than 20km/h any reading taken in such conditions will be disregarded. Wind speed is to be recorded at a minimum of 15 minute intervals during any testing session.
- (h) Noise meter manufacturer instructions shall be followed in respect to the effect of temperature and/or atmospheric conditions.

- (i) Each reading shall be identified and recorded as emanating from a particular automobile during any testing session.
- (j) Each reading shall be rounded down to the next whole number.

1.3 OFF ROAD NOISE TESTING RECORD KEEPING

A record of each test session shall be kept which shall include the following:

- (a) General test conditions including:
 - (i) Temperature;
 - (ii) Atmospheric pressure;
 - (iii) Wind speed (at a minimum of 15 minute intervals);
 - (iv) Background noise level;
 - (v) Portable calibration test results, both pre and post the test session;
 - (vi) General geographical details of the testing site.
- (b) Result of each test of an automobile, including any variable parameters.

1.4 OFF ROAD NOISE TESTING EQUIPMENT LIST

- (a) The following shall be required to conduct Off Road Noise testing:
 - (i) A noise meter of the relevant Australian Standard;
 - (ii) A portable calibration device;
 - (iii) A current noise meter compliance and calibration certificate;
 - (iv) Instructions for the device;
 - (v) A tripod or similar device to secure the meter in its location; and
 - (vi) An anemometer to measure wind speed.
