

1. INFECTIOUS DISEASES

Motorsport Australia requires that all those who are likely to come into contact with blood or body fluids be issued with disposable gloves. This includes circuit medical staff, flag marshals, and all trackside personnel who are likely to be involved in attending an incident.

Marshals should report any open cuts or abrasions to the track medical officer. In the case of a driver who does not require medical treatment, any cuts or abrasions sustained must also be reported to the medical officer.

It is strongly recommended that drivers and officials are vaccinated for Hepatitis "B"
